## About GBPCG

The Global Bio Pharma Conference Group (GBPCG) is a non-profit entity comprising highly qualified professionals representing Global Companies. The mission of GBPCG is to bring leaders of global industries together on a regular basis in order to promote globalization of bio pharmaceutical industries and discuss seminal and contemporary topics of interest. The GBPCG conducted its first yet highly successful event, The Global Bio Pharma Conference 2004: Emerging Issues, Challenges and Opportunities in the New Millenium held in Mumbai, India from September 14-17.

## Conference Objective

The conference will focus on the synergies driven by the needs of the globalization of rapidly growing biotechnology /biopharmaceutical industry. The conference will include leading experts from the global biopharmaceutical industry, academia, US-FDA & Indian FDA and the investment community from US, EU and Asia who will discuss significant opportunities that are beckoning the nascent but fast growing biotechnology industry in emerging markets and also prepare professionals for the exciting world of biotechnology entrepreneurship through the first of its kind Biotechnology Entrepreneurship boot-camp. In addition, a full day of technical workshops conducted by industry experts on contemporary topics will precede the conference.

## Program Content

The conference topics include new innovations in biotechnology, technology transfer, clinical research and regulatory aspects (Nov. 9-10, 2006). A cornerstone of this conference is the launch of the International Institute of Biotechnology Entrepreneurship featuring a Biotechnology "BootCamp". The Boot Camp conducted by Stephen Sammut, a faculty member of the Wharton business school, and MD Burrill and Company, USA, is offered annually at the Bio conference in the US and is being offered for the first time outside the US. The Bootcamp includes highly qualified and experienced speakers from the World's leading business schools and industry professionals and is designed for entrepreneurs, senior executives and leading researchers to develop successful biotechnology ventures (Nov. 11-12, 2006). It also offers Workshops on NIH Funding Strategy, the role of Lean Six Sigma in the complex biopharmaceuticals, Clinical Trials, Aseptic Manufacturing and Sterility/Biodurden Testing Strategy from Global Biopharma leaders and executives (Nov. 8, 2006).

## Stakeholders

The conference is especially designed for stakeholders to promote their success in the biotechnology industry including, but not limited to, scientific community, business executives, service providers, and financial institutions that are major investors in the industry. In addition to various interactive sessions, the conference program also features workshops to train professionals on topics pertinent to biotechnology industries.
